

*The Department of Architecture, Design
& Media Technology at Aalborg University
is hosting the Ph.D. course*

In Search for an Integral Building Culture

*Relations between the Architectural Volume
and the Urban Surface*

9. - 12. October, 2018

Professor David Leatherbarrow

University of Pennsylvania

Professor Anne Beim

The Royal Danish Academy of Fine Arts

Professor Runa Hellwig

Aalborg University

Associate Professor Lea Holst Laursen

Aalborg University

Associate Professor Marie Frier Hvejsel

Aalborg University

Present day building culture is governed by an increased number of interlinked cultural and environmental challenges, counting urban densification and climate changes among others. This PhD course seeks to explore an integral building culture that joins the sensuous discipline of architectural making and the large-scale analytical outlook of urban design in a bridging of these challenges.

The Ph.d. course will include lectures, reading circles discussions, workshops and presentations.

The Ph.d.-course and accomodated research is affiliated with the following research groups at AAU:

Tectonics in Architecture

www.tia.aau.dk

Urban Design - Transformation

www.create.aau.dk/research/Urban+Design+-+Transformation

Deadline for signing up: **15 August 2018**

Number of seats: 15
